

Assignment #4

Due Date: 6/6/16 by 11:59pm

Deliverable: post your homework as a single zipped file on D2L with the name Assignment4_YourLastName,FirstName"

High-Level Requirements:

Rework Assignment#2 or Assignment #3 (In other words you could use Servlets, JSP, or combination of both for this assignment) to add the following features/capabilities:

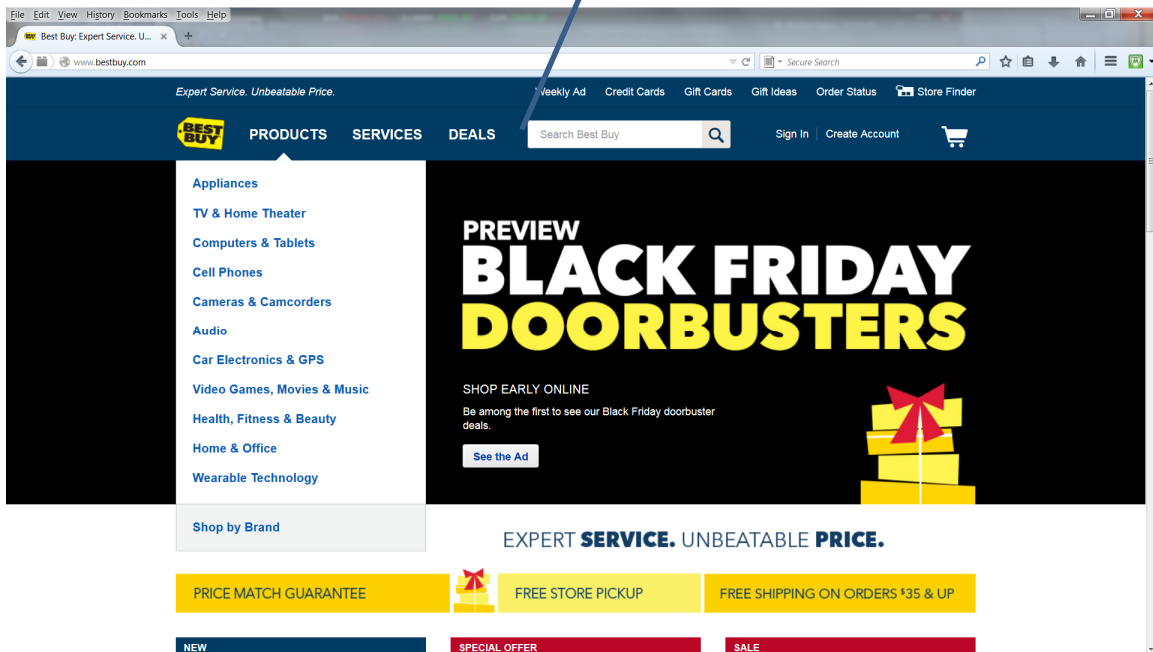

1. **Search Auto-Completion** feature. See below an illustration for a screen-shot of BestBuy web site for the **Search Auto-Completion** feature
2. **Use Servlets/MySQL** to add/remove/update customer orders into MySQL database; this features requires **only Customer's ORDERS** to be in MySQL database, you are free to have any number of tables in MySQL for this assignment.

Deliverables:

- Capture **ALL** screen-shots of features/capabilities being implemented and save them in a file called output.pdf
- All source code and byte code shall be submitted.
- Your submission shall be in a single zipped file with the name **Assignment4_YourLastName,FirstName**

1

Textfield is available for users to enter search keywords

2
